

Green Earth through CO₂ reduction

March 2022

<https://token-aha.org>

OUR VISION

Anagata token has been officially launched in December 2021 and our dream to be a trustable and biggest token from Indonesia for carbon dioxide (CO₂) reduction, through green energy projects and green business projects collaboration. Anagata's vision is to oversee the transformation of energy in Indonesia into green energy and contribute to any green energy project related such as carbon trade, water and air treatment conservation or any entity who owned business value.

Start from Indonesia, Anagata token will support any worldwide green projects with sustainable economic value in the future.

In the next 5 years, Anagata token will focus on collaborating with any stakeholders in Indonesia that focus to achieve energy mixed 23% of renewable energy by 2025. Solar PV projects and Carbon Trade Platform will be Anagata token's focus as underlying project. As a country under the equator, Indonesia has 207 GW potency of solar PV project with estimated value of USD +140 billion and billions ton of CO₂ reduction.

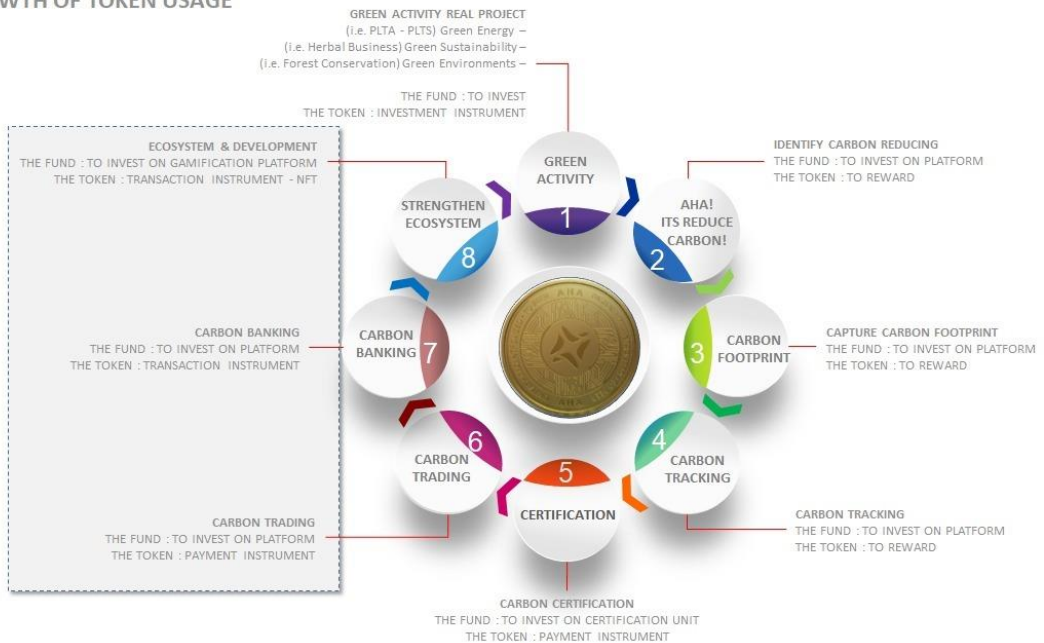

OUR MISSION

Anagata token is a decentralized yield-generation utility eco-token. The token based on the Binance Smart Chain (BSC) technology, providing safe, secure and yield-generation for all holders. Anagata token is a utility token ecosystem and will be used as **investment, transaction and donation token** for :

- Investment for Green Initiative :
 - Green Energy Project
 - Green Sustainable Project
 - Green Social Project
- Transaction for carbon trading and gamification
- Network donation pooling.

FOCUS GROWTH OF TOKEN USAGE

OUR MISSION

Recognizing the harmful impacts of cryptocurrency mining and global warming problems on the environment, which will result in a decrease in world GDP by 18%; beating the decline in world GDP due to the Global Financial Crisis and the Pandemic Crisis. Anagata token focuses on ecological conservation efforts, helping to offset, mitigate, and potentially reverse the damage done by humans and other carbon footprint activities.

With a concerns of those problems, Anagata token aims to provide a reward for green mindset people that are in-line on save our planet's programs. We let people contribute CO₂ reduction with Anagata tokens as reward.

People will be able to engage through gamification, which will result real life trees planting across the region, in which will contribute towards CO₂ reduction in Indonesia. Anagata token will also create NFTs that will involve communities and go green mindset people.

OUR SOLUTIONS

It is Anagata token's primary mission to support and accelerate CO₂ reduction in Indonesia and Asia region, therefore it's our priority that we collaborate with all key stakeholders that are highly relevant and important to reach the mission goals.

Anagata token will be continuously supporting **global movement and commitment** for CO₂ reduction by **supporting green energy projects development**, which is very essential as a future green energy replacement of current fossil based energy producers.

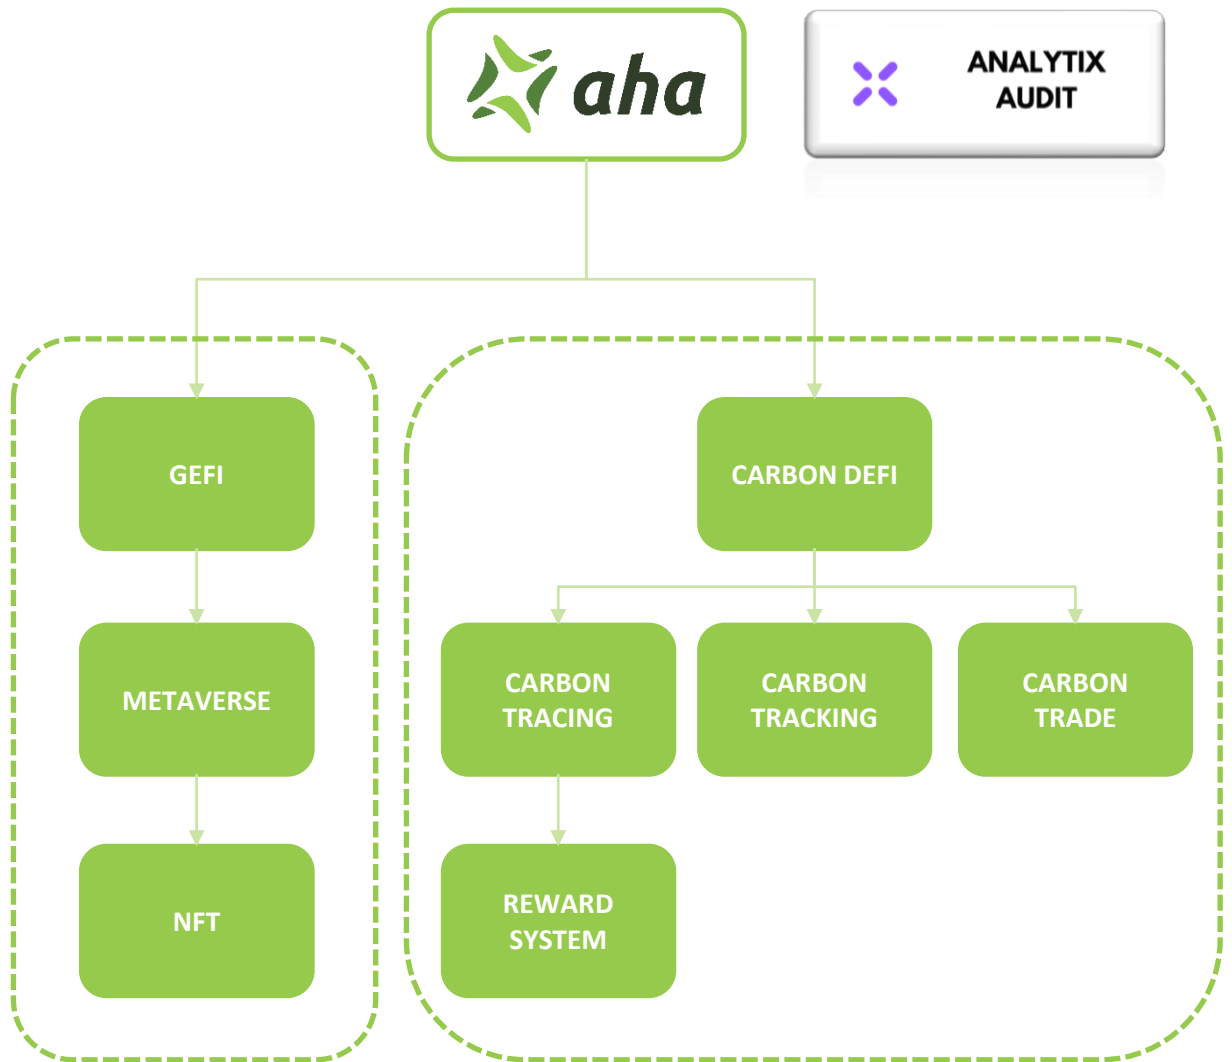

Anagata token will be **collaborating with existing green projects**, to enable larger areas that will be covered and optimizing CO₂ reduction within specific regions that require more support.

Anagata token will be doing **education empowerment** to general public and youth regarding **awareness of CO₂ reduction importance** and what can be done to contribute and participate in the movement.

Anagata token will be **rewarding people** who will be contributing towards **CO₂ footprint reduction**, all contributions performance will be monitored and updated to general public on monthly bases.

ANAGATA PROJECT TEAM

Aswin Regawa (CEO)

Aswin has a 21 years of wide global exposure in marketing & branding, project management and business development. He was a former country sales manager for Facebook Indonesia and many multinational advertising agencies. Anagata will contribute to the birth of a carbon bank in Indonesia, regionally and globally. We will be the connecting link for all green initiatives for the future earth. PRITHVI ANAGATA!

Aditya Rahadyan (CTO)

Adit is a full time crypto and blockchain enthusiasm in recent years. As one of the founders and token developers, Adit has high exposure in blockchain development.

Together with his IT team, Adit is committed to developing the platforms needed by the Anagata token in realizing the vision of the future earth. Vision is seeing the future from now on. The Anagata token has a very ambitious vision but is also a global issue today. I am very excited to be a part of this team.

Tedi S. Wintoko (CFOO)

15 years in the banking and financial industry, both retail and corporate, has brought Tedi to have sufficient competence to oversee the Anagata Token from a financial perspective.

Anagata combines the legendary blockchain technology and the real idea of saving the earth. I am very enthusiastic about joining this project. PRITHVI ANAGATA!

Agustinus Prajaka (ADVISOR)

Prajaka is a Ph.D. in the capital market law. Industrial transformation has brought human civilization to the next level. Real assets has become paper assets and now digital assets allow many ideas to be realized.

And the real big idea is when we collectively make an impact on our earth while also having an impact on the economy and humanity. Anagata is a truly big idea and I'm in.

I will ensure this idea complies in the midst of many regulations and institutions that have not yet been formed. I really dream of a carbon bank can be realized.
